

Technical Industrial Placement

Vacancy application deadline: 20th February 2012

The Opportunity:

On our Technical Industrial Placement Programme, you could find yourself as a Support Analyst, or within our Technical Architecture teams, or as a Test Analyst. It's a great opportunity to spend time with some of the most talented people in the industry and learn from other members of project teams.

We have positions available in technical roles across numerous areas of the business. You will be working in multi-functional teams and will experience how a project works to real deadline for a real client. You will also be able to work with a range of people that will support you during your placement (peer group, project team members, buddy, manager, HR representative).

You'll normally undertake a work placement between July and September. Reviews will take place at 3, 6 and 12 months. The final exit review is designed to assess the year and your overall performance. If things have worked out well and the opportunities are available, we may be able to offer you a place on our graduate programme.

We give our students the right start with a **real** job with **real** responsibilities. By spending your placement year at CSC you will have the opportunity to gain experience working with some of the most talented people in the industry, and for some of our most exciting clients.

Education

Many organisations offering intern opportunities will require a minimum predicted grade of 2:1. For the purposes of this exercise, we will assume all applicants have achieved a minimum grade of 2:1, please complete the relevant section of the application form to reflect this.

Skills and Experience

Basic knowledge and understanding of Microsoft office is vital. Good communication skills are paramount. Some work experience or participation in meaningful extra- curricular activities may be beneficial to your chosen field. This said, the most important skills to have are those around team working, problem solving and customer focus; and we believe that people who demonstrate these kinds of skills at our Assessment Centres can be taught anything else that we need them to know! As well as all this, enthusiasm and a passion for what you do is vital!

Eligibility

All first year undergraduates studying within the School of Mathematics at The University of Manchester are eligible to apply for this post.

Application Process

Applications for this post will be considered from the submitted application form, with short-listed candidates being invited for interview on the afternoon of the 29th February 2012 in the Alan Turing Building.

Successfully short-listed candidates will be informed of their interview time by 5pm on Friday 24th February 2012.
